Meadowmeer Water System Customer,

Please take a few minutes to complete this water use survey. The purpose is to identify potential sources of contamination to your water system. (Cross Connections). If there is a loss of water pressure due to a main break, fire hydrant use, or power outage, it's possible to have backflow from private properties, resulting in contamination of the entire system. It is a Washington State Health Department requirement (WAC 246-290-490) that these potential sources have the appropriate level of backflow prevention. (Cross Connection Control).

Do you have a backflow prevention assembly on your property? Yes No

Manufacturer: _____

Size: _____

Location on property: _____

Do you have/use any of the following on your property?

- 1. Antifreeze flush kits Yes No
2. Auxiliary water supply (Any source other than system connection) Yes No
